The Lemurian Sun Salutation practice must be performed outdoors in an open place during sunrise and sunset.

Posture one

- Choose suitable outdoor venue.
- Stand on a cotton mat such that your feet are at forty five degrees. Close your eyelids slowly.
- One second meditation. Then slowly open your eyelids.

Benefits of this posture

The practitioner feels pleasure and no strain can be encountered.

Posture two

Change your position. Let your face and shoulders move towards the right side simultaneously raising your right hands above your head. The palms should face the floor. Do this same posture with your left hand. Now keep prayer mudra and slowly close your eyelids for one second meditation. Then release your hands towards your head and then place them before your chest. Keeping the same prayer mudra slowly close down your eyelids. Then begin to chant OM while inhaling and IMM during exhaling. Om is a cosmic mantra and IMM is bio mantra. These combined recitation of these mantras and the relevant vibrations, pulses and radiations UNITE the cosmic energy with bio energy. Repeat this for ten times putting your thoughts at your fingers. Concentrate on your left small finger during OM IMM, then focus your thoughts on the ring finger during the second recitation of OM... IMM. This is the proper way of chanting. It has been a proven fact that fifty percent of the switches are located at the palms and fingers of hands and the other fifty percent switches lie at the fingers and palms of the feet.

After proper twelve chanting this changes your position by releasing prayer mudra.

Benefits of this posture

More and more cosmic energy is added to bio energy. According to physical law, energy is the capacity to do work. So, in order to function the human organs efficiently and naturally energy is required. This posture along with breathing and Om – IMM chanting makes the performer for the natural functions of his/her body organs. Moreover mental oscillations will disappear and the performer gets focus and concentration resulting in physical and mental enjoyment and bliss.

Now begin to chant the following mantras mentally without the moving of your lips. Keep your attention at the NAABI/THOPPIL center. This is essential.

Chant Om Pakalava during inhalation and recite the remaining mantra while exhalation

- Om Pakalava ANTHANAM
- Om Pakalava AANTHANAM
- Om Pakalava INTHANAM
- Om Pakalava EENTHANAM
- Om Pakalava UNTHANAM
- Om Pakalava OONTHANAM
- Om Pakalava ENHANAM
- Om Pakalava EEANTHANAM
- Om Pagalava ONTHANAM
- Om Pakalava OONTHANAM
- Om Pakalava AINTHANAM
- Om Pakalava AOUNTHANAM

There are 1, 00,008 mantras of the Lemurian Sun Salutations. This is the basic applicable to each and every human being. This first Lemurian Sun Salutation is useful for students and all other mental workers.

The highest form of the Lemurian Sun Salutation is performed by all types of Cobras. There are separate cobra mantras and cobra breathing techniques and cobra postures. Only by doing this Sun Salutation, the cobra yields NAGAMANI.

Both the bull and cobra are indispensable to Lord Siva. These two are gems in spirituality and meditation. These possess enormous pulses, vibrations, and radiations resulting in AURA.

There are specific Sun Salutation mantras for each mental problem, each physical problem, for physical growth, mental growth and physical uplift. Also, there are Sun Salutation mantras to get salvation/liberation.

In the Sanathana Dharma, Lord Karna was a number one Sun Salutation practitioner. Through this practice, he was able to view the FULL VISHVA ROOPA of Lord Krishna through his physical eyes in the battlefield of Mahabharata. But the great warrior was a miserably failed candidate in this crucial test. Even the all-powerful lord Krishna could not compete with Lord Karna. Moreover this basic Lemurian Sun Salutation helps the performer to strictly follow Yama and Niyama of Patanjali's Yoga sutras. Without these two spiritual success one cannot attain Salvation/ Liberation. But the Himalayan and the Lemurian Sun Salutations are not similar. There are several distinct types. Currently there are Maha Monks, Maha Munis, and Great Sages and great Yogis of the Himalayan regions practice SURYA KRIYA. These enlightened and realized persons get energy from the sun for the proper function of their bodies. They do not eat or drink anything at all. But this is a hidden treasure and nobody will unlock it.

The regular practice of the Lemurian Sexual Sun Salutation was the ONLY hidden secret behind Lord Krishna's copulation with 12000 Gobbies. Also, one of the greatest Tamil Siddhar Bogor applied this same technique to do coitus with hundreds of women.

These are not flashed or printed. One can know these highest spiritual preaching only from the mouth of a genuine Master.

Let us note that the fundamental Gayathri mantra denotes Lord Sun. This was one of the groundbreaking formulations of the great Sage Vishvamithra.

Comfortably stand on a cotton mat. Slowly close the eyelids and meditate for a second. Then open the eyelids. Start slowly moving down NATURALLY and sit on the mat. During this movement, slow exhalation is a must. Inhale and exhale by stretching the left leg in front of you. Then inhale .Keep moving towards the left knee simultaneously exhaling. Discussion

The Lemurian yogic practices were formulated by the great Monks, Seers and Siddhars. Till this day, it remains a hidden secret.

The author has removed the curtains and made it public in his previous publications [1-16]. The author appeals to the relevant communities to look at these works.

Characteristics of the Sun

- Mass: 1.98892×10^{30} kg.
- Diameter: 1,391,000 kilometers.
- Radius: 695,500 km.
- Surface gravity of the Sun: 27.94 g.
- Volume of the Sun: 1.412×10^{18} km³
- Density of the Sun: 1.622×10^5 kg/m³

Distance

The Sun is 149,600,000 km (92 million miles) from the Earth. Since the speed of light is 303,000 km/sec (186,000 miles/second), it takes the light slightly over 8 minutes to get from the Sun to the Earth.

The distance of the Sun to the Earth is called an Astronomical Unit (AU) and is sometimes used to denote large distances that are less than a light year.

Contents

The Sun consists of about 70% Hydrogen, 28% Helium and 2% of metals such as iron. Other characteristics are its rotation, temperature, and radiation.

Temperature

Its temperature is extremely hot, with the surface being about 5000°C and the centre core at 15,600,000°C. The high temperature in the core, along with extreme pressure from the Sun's mass, result in nuclear fusion reactions. Two Hydrogen nuclei (protons) combine with two neutrons to form a Helium nucleus plus a release of energy.

Briefly Concluding

The Sun is the center of our solar system, with 9 planets and is one of billions of stars in our galaxy. The Sun provides light and heat to the orbiting planets. It is extremely large compared to the Earth and is 92 million miles away. The temperature inside the Sun reaches 15 million degrees, being driven by nuclear fusion reactions. The surface of the Sun gives off visible light, charged particles and occasionally high energy particles.

The chief and prime mantra is that of Gayathri and the main posture is the Sun Salutation. To obtain prompt results, regular practice is required. This Lemurian method has no side effects. This package is most useful for mental and physical workers.

During rainy seasons and when the sun is not visible due to clouds, the performer must visualize the sun mentally and then practice. This is most important. If you perform properly and daily the Sun will not let you down!
