In nature solutions come first and then questions or problems. Breast milk is ready before birth of baby. In nature we saw one mother feeds her milk to other's newborn or even newborn of other species. In present study the author has taken very important and essential topic for research is "Assess the effect of Planned Teaching on Knowledge Regarding human milk banking among the staff nurses in selected hospitals of Pune city".

This is critical type of editorial opinions on research article regarding human milk banking. It has many facets, cultural views, suspected health problems of mother (Doner) and child (Recipient), how to repay the kindness, place, and policies to get it and so on.

In this study need to add or emphasis on need of study, review of literature, ethical permission, conceptual framework, discussion, implication and references.

Breast milk donation helps infants receive all health benefits of human milk, even if it can't come from their own mothers (<https://www.mysouthernhealth.com/breast-milk-donation/>). In need mention the specific advantages of human milk bank. Review of literatures must include local, recent and specific to topic. (Knowledge and Attitude of Indian Parous Women toward Human Milk Banking Maninderjeet Kaur, Seema Raghuvanshi, and Harmeet Kaur Kang. Indian J Community Med. 2019 Apr-Jun; 44(2): 175-176.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6625253/>, Indian J Community Med. 2019 Apr-Jun; 44(2): 175-176.).

Ethical permission did not show the name of agency. Author may omit the points instead of writing incomplete as implications and recommending. References are advised to write on Vancouver style. Ref no 7. No name of author and ref. no. 9. full names of authors.

As an editor, I appreciate the topic, full and correct description of research methodology, statistical table and graphical presentation and DTP work is excellent. Add similar study results in discussion.

Conclusion of study, the author fulfilled the objective and hypothesis. Complement to this study, find the promotive factors and utilization of human breast milk is vital. With above modification this article will be accepted for publication.
